## EXPERIENCE (Last 5 years)

### **Large Accounting Firm, (South Bend, IN)**

#### **SharePoint Architect**

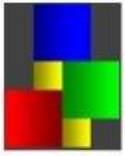

<Microsoft Office SharePoint Server, SharePoint Portal Server, Windows SharePoint Services, C#, SQL Server>  
SharePoint migration of SPS 2003 content to MOSS 2007.

### **Large Accounting Firm, (South Bend, IN)**

#### **SharePoint Architect**

<Microsoft Office SharePoint Server, Windows SharePoint Services, C#, SQL Server>

Architected, built and implemented a migration tracking application for the management of site migrations.

**Large Accounting Firm, (South Bend, IN)**

**SharePoint Architect**

<Microsoft Office SharePoint Server, SharePoint Portal Server, Windows SharePoint Services, InfoPath, C#, SQL Server>

Customization and Design in a major branding effort for the entire intranet as well as all internal collaboration sites. This included the branding of system and administrative pages as well as several custom built components.

**Large Accounting Firm, (South Bend, IN)**

**SharePoint Architect**

<Microsoft Office SharePoint Server, SharePoint Portal Server, Windows SharePoint Services>

Re-architected intranet and collaboration infrastructure to ensure optimal management of sites.

**Large Accounting Firm, (South Bend, IN)**

**SharePoint Architect**

<Microsoft Office SharePoint Server, Windows SharePoint Services, InfoPath>

Architected, built and implemented a Partner Nomination application that managed several phases of the nomination process as well as security and visibility requirements related to each phase.

**Large Accounting Firm, (South Bend, IN)**

**SharePoint Architect**

<Microsoft Office SharePoint Server, Windows SharePoint Services, C#, SQL Server>

Architected, built and implemented a security control application for the SharePoint Extranet.

**Large Accounting Firm, (South Bend, IN)**

**SharePoint Architect**

<Microsoft Office SharePoint Server, Windows SharePoint Services>

Architected and designed the taxonomy for the implementation of a SharePoint Extranet client collaboration environment.

**Computer Training Company, (Chicago, IL)**

**BizTalk Architect**

<BizTalk, C#, ASP.NET, Great Planes, SQL Server>

Architected, developed and implemented an integration engine between Great Planes and custom ASP.NET/SQL applications.

**Auto Manufacturer, (Lafayette, IN)**

**SharePoint Architect**

<SharePoint Portal Server, Windows SharePoint Services, InfoPath>

Architected, developed and implemented a Knowledge Management and Collaboration solution that enabled the legal department that allowed the department to seamlessly collaborate with 3<sup>rd</sup> party firms and other branches on cases and research.

**Hospital/Health Care Organization, (Indianapolis, IN)**

**Technical Lead**

<BizTalk, HL7, Datagate, MLLP, SQL Server, Windows Server, Windows SharePoint Services, InfoPath, Workflow>

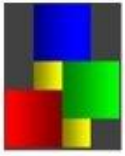

Architected, developed and implemented an InfoPath/WSS workflow solution that is fed from BizTalk/HL7 information. The solution is used for patient pre registration and management.

**Technology Solutions Company, (Indianapolis, IN)**

**Technical Lead**

<SharePoint Portal Server, Windows SharePoint Services, SQL Server, Windows Server, C#, ASP.NET, CSS>

Architected, developed and implemented a SharePoint based intranet replacement solution with custom styles to match corporate branding and custom web parts to deliver desired functionality not present in standard SharePoint..

**Hospital/Health Care Organization, (Indianapolis, IN)**

**Technical Lead**

<BizTalk, SQL Server (Cluster), Windows Server>

Conducted the installation and configuration of a production BizTalk environment running both BizTalk and SQL Server clusters.

**Workers Compensation Insurance, (Columbus, OH), (\$2 232 mil Annual Sales and \$21 332 mil in Assets)**

**Development Lead**

<SharePoint Portal Server, Windows SharePoint Services, Windows Server, C#, ASP.NET, ADO.NET, SQL Server, CSS, CAML Script>

Development lead, leading a team of 8 developers and technical writers from the client as well multiple contract/consulting agencies in the development of a SharePoint collaboration project designed to connect geographically disparate teams, improve productivity and reduce turn around time on case collaboration. Custom site and area definitions had to be built to conform to client needs and custom security was also implemented to manage a more granular security model than native SharePoint supports.

**Workers Compensation Insurance, (Columbus, OH), (\$2 232 mil Annual Sales and \$21 332 mil in Assets)**

**Technical Lead**

<SharePoint Portal Server, Windows SharePoint Services, Windows Server, C#, ASP.NET, ADO.NET, SQL Server, FrontPage, CSS>

Architected, developed and implemented a SharePoint based knowledge management solution designed to handle the agency documentation for the Integration Competency Center. Developed several custom web parts to assist in the management of documents. Customized look and feel using FrontPage and CSS.

**Membership Organization, (Indianapolis, IN)**

**Technical Lead**

<BizTalk, SQL Server, Windows Server>

Conducted the installation and configuration of Development, Stage and Production BizTalk environments.

**Electronic Consumer Products Distributor, (Knoxville, TN)**

**Technical Lead**

<BizTalk, SQL Server, Windows Server>

Architected, developed and implemented a BizTalk solution that consumes Excel attachments from email in order to populate process data tables in SQL Server.

**Automotive Component Manufacturer, (Grand Rapids, MI)**

**Technical Lead**

<HTTP, BizTalk, SQL Server, Windows Server>

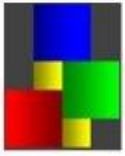

Architected, developed and implemented a HTTP based BizTalk solution to integrate disparate systems allowing better, faster and more reliable access to information.

**Manufacturer of industrial power transmission and conveying components, (Indianapolis, IN), (\$800 mil in Annual Sales)**

**Technical Lead**

<SharePoint Portal Server, Windows SharePoint Services, BizTalk, VB.NET, COMTI, Host Integration Server, CICS, Cobol, Cincom/Supra, Windows Server, Mainframe>

Architected, developed and implemented a SharePoint based solution that leverages BizTalk to gain access to Cincom Supra databases on the mainframe incorporating 23 COMTI methods accommodating both character and binary/packed data transmissions.

**Manufacturer of industrial power transmission and conveying components, (Indianapolis, IN), (\$800 mil in Annual Sales)**

**Technical Lead**

*<SharePoint Portal Server, Windows SharePoint Server, Windows Server>*

Architected, developed, implemented and promoted a SharePoint 2003 solution to handle corporate document management for over 30,000 documents which were traditionally housed on the mainframe. The solution included main site design as well as porting content from the mainframe and conversion into Microsoft Word format to enable indexing and search. The solution was then later extended to take over as the main enterprise intranet boosting the information dissemination capability within the enterprise.

**Manufacturer of industrial power transmission and conveying components, (Indianapolis, IN), (\$800 mil in Annual Sales)**

**Project Manager**

*<HTTP, SSL, BizTalk, Host Integration Server, COM+, CICS, Cobol, ObjectStar, Cincom/Supra, Windows Server, Mainframe>*

Managed a high pressure, short fixed time frame target BizTalk project which allows a major distributor mainframe system access for part price lookups through a VPN based HTTPS tunnel.

**Manufacturer of industrial power transmission and conveying components, (Indianapolis, IN), (\$800 mil in Annual Sales)**

**Technical Lead, Lead Developer**

*<VB6, COM, Windows Server>*

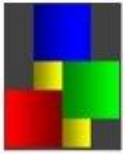

Development of a replacement control for the Component One TrueDB Dropdown control which malfunctioned under Windows Server 2003. The control was failing as a result of application servers being upgraded to Windows Server 2003. Managed the "Rip & Strip" project automating the replacement of the old control with the new replacement version.

**Manufacturer of industrial power transmission and conveying components, (Indianapolis, IN), (\$800 mil in Annual Sales)**

**Technical Lead, Main Developer**

*<C#, ADO.NET, ASP.NET, SQL Server, Windows Server>*

Development of a real-time time tracking and resource management application. The application was designed to allow users the ability to easily track their time in real time. Managers had the ability to manage user queues and report on activities for any user specified period. The application helped streamline human resource planning and productivity time maximization for planned projects.
